

## Braemar integrated cooling systems

Cooling systems specifically designed to complement your new or existing\* Braemar ducted gas heating system, for year round comfort.

The Braemar "U" Series integrated cooler is the **leader** in MEPS compliance, and is specifically designed, tested and registered in the 'cool only' category in Australia.

**First with  
MEPS  
compliance**

### Braemar heating has found its perfect match

Australians and New Zealanders have been coming home to the wonderful warmth of Braemar ducted gas heating for more than 50 years, and Braemar Ecostar is Australia and New Zealand's most efficient range of ducted gas heaters.

But **now**, you can be comfortable all year round with Braemar's integrated cooling system. This system is specially designed to use the same ductwork and grilles as Braemar ducted gas heating – which makes installation and operation so much easier. You can use Braemar integrated cooling with existing\* Braemar ducted gas heating systems, as well as new installations. Ask your dealer for details.

### One heater, one cooler, one control

You can have year round heating and cooling, using one controller – the Braemar Spectrolink Comfort Control. All Braemar four, five, six star and **"Super-Six"** ducted gas heating systems offer you the ability to heat up to four different zones to different temperatures.

Now, using the new Braemar TH4, TH5, THM5, THM6 or TSS6 Star Extra Air series ducted gas heater with Braemar integrated cooling, you can have different **cooling** temperatures in up to four different zones, too. You can even choose to just cool one zone\*\* – enhancing your comfort and helping to reduce your power bills.

Braemar integrated cooling units are compact, economical to run and use R410A refrigerant, which is less harmful to the environment than the more commonly used R22 refrigerant.

### Choices to suit you

There are five models of Braemar integrated cooling, delivering 630 to 1050 litres per second of nominal airflow and a rated capacity of 8.8kW to 20.0kW (as shown in table below).

### Backed by the strength of Seeley International

Like all Braemar products, Braemar integrated cooling systems are backed by Seeley International's renowned service and support. With a network of expert dealers and service agents throughout Australia and New Zealand, you can be confident that, when you buy a Seeley International product, you are buying excellence, reliability and super-efficiency in which you can absolutely trust.

### "U" Series specifications

Indoor Unit	Outdoor Unit	Nominal Air Flow (l/s @ 100Pa)	Nominal Capacity (kW)	Nominal AEER <sup>^</sup>	Applicable Braemar Ducted Gas Heaters
